

Adding *Protection* to Protected Bike Lanes

BIKERAIL™ is a strong steel rail system designed to create a fully protected bike lane. It offers the substantial protection of a concrete curb . . . but it's a quick-build solution and is 100% changeable, movable and reusable.

Modular & Rapidly Deployable

A modular system, BIKERAIL is easy to assemble, expand, contract or reshape. Rails connect and swivel at posts to create the desired barrier configuration. Posts have a narrow footprint to accommodate minimal buffer zones, and can be anchored into asphalt or concrete. Vertical flex delineators can be attached to any post. Rails sit 2-1/4" above grade to allow for storm water drainage and debris clearance. Choose galvanized or a powder coat color (over galvanized) finish.

Permanent or Temporary

When anchored, BIKERAIL forms a strong, secure and permanent barrier. If it must be reconfigured or relocated, simply remove the anchors in seconds to move and repurpose the entire system. Ideal for new or retrofit applications as it does not impact planned or existing utilities.

BIKERAIL™ at a Glance

- Protected Bike Lane barrier
- Strong, modular, adjustable system
- Steel rails: 3"w x 5"H
4' and 8' lengths
- Rapidly deployable: easy install/uninstall
- Permanent or temporary installation
- New or retrofit construction
- 5-1/4" footprint
- 7-1/4" overall height
- 2-1/4" clearance above grade
- Add Flex Delineators to any Post
- Galvanized or powder coat color finish

Rapid assembly and deployment during new or retrofit construction

As a temporary installation or pilot project:
Anchor to concrete or asphalt surface with temporary adhesive or anchoring hardware.

As a permanent installation:
Anchor to concrete surface with 3" Titen anchors.
Anchor to asphalt surface with 5" Titen anchors.

FINISH OPTIONS

Galvanized

Powder Coat over Galvanized
